

IN THE CLAIMS

- Sub B1
1. (Currently Amended) A computerized method for displaying images comprising:  
accessing a plurality of presentation images having inconsistent presentation attributes;  
arranging the presentation images according to at least one characteristic; and  
combining the presentation images in a visual presentation, wherein combining includes  
modifying the presentation images to have consistent presentation attributes.
  2. (Original) The computerized method of claim 1 further comprising:  
selecting the characteristic from the group consisting of distance, perspective,  
magnification, and angle.
  - AB 3. (Original) The computerized method of claim 1 further comprising:  
modifying at least one of the presentation images.
  4. (Original) The computerized method of claim 1 further comprising:  
accessing an address for a location.
  5. (Original) The computerized method of claim 1 further comprising:  
accessing location coordinates for a location.
  6. (Original) The computerized method of claim 1 further comprising:  
receiving compensation from a client.

7. (Original) The computerized method of claim 1 further comprising:  
accessing viewing preferences, wherein the viewing preferences are selected by a  
computer user and affect the appearance of the visual presentation.
8. (Original) The computerized method of claim 1 wherein accessing a plurality of  
presentation images comprises:  
uploading a plurality of presentation images from a client.
- BI 9. (Original) The computerized method of claim 1 wherein accessing a plurality of  
presentation images comprises:  
loading a plurality of presentation images from a database.
- AB 10. (Original) The computerized method of claim 1 wherein accessing a plurality of  
presentation images comprises:  
uploading at least one presentation image from a client; and  
loading at least one presentation image from a database.
11. (Original) The computerized method of claim 1 wherein accessing a plurality of  
presentation images comprises:  
loading at least one presentation image from a computer-readable medium.
12. (Original) The computerized method of claim 1 further comprising:  
sending the visual presentation to a client.

13. (Original) The computerized method of claim 1 further comprising:  
saving the visual presentation on a computer-readable medium.

14. (Currently Amended) A computerized system comprising:  
a processing unit;  
a memory coupled to the processing unit through a system bus;  
a computer-readable medium coupled to the processing unit through the system bus; and  
a program executed from the computer-readable medium by the processing unit, wherein  
the program causes the processing unit to access a plurality of presentation images having  
inconsistent presentation attributes, arrange the presentation images according to at least one  
characteristic, and combine the presentation images in a visual presentation, wherein to combine  
the presentation images includes to modify the presentation images to have consistent  
presentation attributes.

15. (Original) The computerized system of claim 14 wherein the program further causes the  
processing unit to select the characteristic from the group consisting of distance, perspective,  
magnification, and angle.

16. (Original) The computerized system of claim 14 wherein the program further causes the  
processing unit to modify at least one of the presentation images.

17. (Original) The computerized system of claim 14 wherein the program further causes the  
processing unit to access an address for a location.

18. (Original) The computerized system of claim 14 wherein the program further causes the processing unit to access location coordinates for a location.

19. (Original) The computerized system of claim 14 wherein the program further causes the processing unit to receive compensation from a client.

b1  
A6  
20. (Original) The computerized system of claim 14 wherein the program further causes the processing unit to access viewing preferences, wherein the viewing preferences are selected by the user and affect the appearance of the visual presentation.

21. (Original) The computerized system of claim 14 wherein the program further causes the processing unit to send the visual presentation to a client.

22. (Original) The computerized system of claim 14 wherein the program further causes the processing unit to save the visual presentation on a computer-readable medium.

23. (Currently Amended) A first computer-readable medium having computer-executable instructions for creating a visual presentation comprising:

accessing a plurality of presentation images having inconsistent presentation attributes;

arranging the presentation images according to at least one characteristic; and

combining the presentation images in a visual presentation, wherein combining includes modifying the presentation images to have consistent presentation attributes.

24. (Original) The first computer-readable medium of claim 23 having computer-executable instructions further comprising:

selecting the characteristic from the group consisting of distance, perspective, magnification, and angle.

25. (Original) The first computer-readable medium of claim 23 having computer-executable instructions further comprising:

modifying at least one of the presentation images.

26. (Original) The first computer-readable medium of claim 23 having computer-executable instructions further comprising:

accessing an address for a location.

27. (Original) The first computer-readable medium of claim 23 having computer-executable instructions further comprising:

accessing location coordinates for a location.

28. (Original) The first computer-readable medium of claim 23 having computer-executable instructions further comprising:

receiving compensation from a client.

29. (Original) The first computer-readable medium of claim 23 having computer-executable instructions further comprising:

accessing viewing preferences, wherein the viewing preferences are selected by a computer user and affect the appearance of the visual presentation.

30. (Original) The first computer-readable medium of claim 23 having computer-executable instructions further comprising:

uploading a plurality of presentation images from a client.

31. (Original) The first computer-readable medium of claim 23 having computer-executable instructions further comprising:

loading a plurality of presentation images from a database.

32. (Original) The first computer-readable medium of claim 23 having computer-executable instructions further comprising:

uploading at least one presentation image from a client; and

loading at least one presentation image from a database.

33. (Original) The first computer-readable medium of claim 23 having computer-executable instructions further comprising:

loading at least one presentation image from a second computer-readable medium.

34. (Original) The first computer-readable medium of claim 23 having computer-executable instructions further comprising:

sending the visual presentation to a client.

35. (Original) The first computer-readable medium of claim 23 having computer-executable instructions further comprising:

saving the visual presentation on a second computer-readable medium.

36. (Withdrawn)

37. (Withdrawn)

38. (Currently Amended) A computerized system comprising:

means for accessing a plurality of presentation images having inconsistent presentation attributes;

means for arranging the presentation images according to at least one characteristic; and

means for combining the presentation images in a visual presentation, wherein combining includes modifying the presentation images to have consistent presentation attributes.

39. (Original) The computerized system of claim 38 further comprising:

means for selecting the characteristic from the group consisting of distance, perspective, magnification, and angle.

40. (Original) The computerized system of claim 38 further comprising:  
means for modifying at least one of the presentation images.

41. (Original) The computerized system of claim 38, further comprising:  
means for receiving compensation from a client.
